PROBLEMS IN ENGLAND.

DILKE ATTACKING THE CABINET. CRITICISING MO. PARNELL'S UTTERANCES-THE

QUESTION OF PROTECTION IN IRELAND. LONDON, Oct. 6 .- Sir Charles Dilke spoke at

Chelses to-day. He taunted Lord Salisbury with weakly concurring with German annexation everywhere, and warned the Government that France intended to dominate Burmah. He advised the Caldnet to confer upon Ireland the widest elective self-government compatible with the integrity of the Empire. It was impossible, he

said to justify the Castle system.

The Times to-day, commenting on Mr. Parnell's speech at Wicklow yesterday says: "The Cabinet, which meets to-day, must consider the situation in Ireland. It is impossible to disguise the fact that the Government of Ireland has passed, or is rapidly passing, out of the hands of Her Majesty's ministers. The latter must defend their polley of abandoning the bill for the renewal of the Coercion act. Mr. Parnell's demand for Home Rule is only preliminary to a further effort to complete the separation of Ireland from Great Britain." The cabinet meet to-day and discused the Bulgarian question and affairs in Ireland. The Marquis of Salisbury indicated to the other Cabinet officials the line of argument he would take in the address which he is to deliver to-morrow at the National Conservative Con-

ference to be held at Newport.

Parliament will be dissolved on the 17th of November. The Government will present to the new Parliament a bill to cheapen and simplify the transfer of land. The Government is carefully studying the subject of local government, and intends to submit a bill for the estab-

It was announced that the Parnamentary fund amounted to \$5,000.

HOME FROM THE FAIRGROUNDS. St. Louis, Oct. 6 (Special).-The Knights of Labor to-day ordered a strike on all the street-ear lines in this city, with the exception of the South St. Louis line. President Johnson, of that road, was the only one of the railroad officers who responded to the call of the committee of Knights for a meeting for arbitration. He also yielded to the demands of the committee. When announcement of the strike became generally known it produced the greatest excitement. Fully 100,000 strangers have arrived in the city since Saturday, and at present crowded special trains on fitteen roads are arriving at the Union Depot every few minutes. The and the visions of the golden harvest which they expected to reap from the country visitors are rapidly fading. Three o'clock came, and the drivers and conductors began turning in their ears. The People's Line was the first to stop. REPLYING TO SENATOR SHERMAN.

EX-SENATOR THURMAN ON SOUTH CAROLINA AND

Toledo, Ohio, Oct. 6.-Ex-Senator Allen G. Thurman was greeted at Wheeler's Opera House to-night with a crowd that was only limited by the capacity of the house. He appeared in good voice, although fre' quently interrupted by coughing, and after apologizing for writing his speech, read from a printed copy, fre quently stopping to add an extemporaneous remark. He was listened to with the greatest attention.

Judge Thurman began his speech by a reference to the Mount Gilead speech of Senator Sherman at the opening of the campaign, and on replying therto, said : " Now it is impossible, as it seems to me, to misunderstand these utterances. They are either vain and empty declaraof Senator Sherman, or in his high station, could indulge mean, when thoroughly analyzed, that if the Republican party cannot obtain power in any other way it shall obtain and hold it by the sword. I know that such an idea, if you do not reflect upon it, is calculated excite your derision, but stop and reflect." The speaker proceeded to answer the arguments of Mr. Sherman concerning the grievous condition of the colored people in the South, asserting that they were now in the enjoyment of greater prosperity and greater civil rights than were ever enjoyed on this globe by an equal number of their race. After disposing of a wilderness of figures in regard to the condition of South Carolina he summed up by saying: "In short, everything that summed up by saying: "In short, everything that feeds or ciothes the negro in that State is within his reach to a degree that he never knew hefore. Now once more I put it to you, could this be the case if South Carolina is in the lawless condition that the radical speakers represent it! No, my fellow critizens, this continued stream of prosperity under Democratic rule proves that it is beneficent and the quiet that prevails in the State proves that the people of all classes there are contented under their Government."

Nutional Cotton Exchange crop report: The yield promises to be much larger than last season. The July fruit is by no means assured anywhere, though it may come out better than is now supposed. The smallness of the fruit may be attributed largely to an overabundance of fruitage in the early part of the season. It will be noticed that the conditions have been more equally distributed this year than last, and the increase in crypprospects extends nearly ever the whole belt. The condition is new placed at 87-2, against 91 last month and 75 last year.

MURDER AND ATTEMPTED SUICIDE.
DETROIT, Oct. 6.—A dispatch to The Evening Journal
says: John Chamberlin, of Hopkins Township,
drowned his baby last Saturday by walking through
Rabbit River with it in his arms, and then cut his own

dead at home and that he had come to surrender himself for having killed her. Roundsman Jacobus sent Policemen Nelson and Kalser to the house and they of ened one of the doors leading to Disgue's apartments with a key which he had given them. On entering the kitchen a horrible sight met their view. Mrs. Disgue was in the middle of the floor in a small pool of blood, which was oozing from a gash (in her neck. A baby boy only five months old, who had been dabbling in the bloodon the floor, was trying to climb up on his mother's breast. The policemen carried the child down stairs and placed him in the care of Mrs. Desmond, the wife of Policeman Desmond, who cwns the house. They then removed the body to Crane's morgue.

County Physician Converse, who made an examination of the body, found that the woman's windpipe was severed, and the appearance of the wound indicated that the knife with which it was made had been turned and twisted two or three times. It was an incised wound beginning near the left ear, extending downward to the middle of the throat, then upward toward the chin and ear. The left carotid artery and the windpipe were both severed and it was evident that the murderer intended to make a complete job of it. The knife with which the deed was committed was on the bureau. It has four blades, and the largest one, which is four inches in length, was stained with blood. A formal charge of urder was entered against Disgue and he made the following statement:

"My name is George Disgue and I charge myself with the murder of my wife. I was born in East Houston at., New York, and now live at No. 89 Adams-st. I have been married six years and have three children. I am a moulder by trade, but I have kept a saloon and worked as a bartender. It will be with the deepest regret that the Christian emmunity will learn that Cardinal McCloskey's lifhas almost reached its termination. The Cardinal has been in failing health for many weeks, and has had occasional attacks of an alarming character, but has in each case rallied sufficiently to be up and about again Last Saturday his condition became so alarming that Keyes, upon arriving at the bedside of his patient, proncunced him in a precarious condition, and advised that the last sacrament be administered. This was done on Sunday by Monsigner Thomas N. Presten, pastor of St. Ann's Church. In order not to alarm the NEWFORT, Oct. 6.—The house of Rear-Admiral Baid-win, U. S. Many called to inquire as to the condition of the Cardinal. Profound quiet reigned in and about his residence, back of the cathedral in Madisonave. Most of the binds were drawn. A bulletin had been prepared by Failer McDonnell, Cardinal McCloskay's secretary, and placed in the hand of an attendant for the information of all inquirers. The bulletin stated the alarming character of the crisis, and the fact that the last sucrament tad been administered. Though the patient's condition was critical no immediate danger was apprehended, There were at his bedsade yesterday, besides his regular attendants, his two nieces. Dr. Keyes said last night, after having made his visit to his patient, that he found him weaker than the day before. He would not promounce the patient in a dying condition, as he was not chilled and his palse was perfectly good. He was not able to take any solid food, and enils a little beef ten and other liquid nourishment. Every day that he billed to railly lessened the chances of his doing so, and the doctor was inclined to think last night that the venerable prelate would not be able to arouse his impaired faculties. He would probably tail slowly, however, and night live for several days, though, on the other hand, to-day might witness his death, or it was even possible that he might pass away during the night. Dr. Keyes said that the Cardinal was suffering from no malady, but there was simply a failure of the vital forces and nervous exhaustion.

The Cardinal is seventy lour years old, but his netive careet has counted for more years than that and has sapped his strength. His jurusdiction extends over about 600,000 souls contained in 175 parishes. These have been informed of the Cardinal's condition and their prayers have been solicited.

We managed to keep the vessel comparatively free from water for four days until we were cought in a revolving furricane or eyelone. The authursts of wind were frightful, and came from all points of the compass. The seas rose to tearful beight, so that we were not only in danger of having our masts twisted out, but feared that we should be swamped by the seas. The leak increased, and for forty-sight hours the men worked at the pumps to keep the vessel affort, while the unbroken volume to keep the vessel affort, while the unbroken volumes of seas swept the length of the derk, threatening to carry everything before them. Finally the gale broke, but our vessel was in a sinking condition, and out only hope was in being rescued. The bark Louisa and Augusta was sighted about 9 a. m. last Tuesday, and she answered our signals of distress. At near she was only about 200 feet from us, but the weather was so rough as to be dangerous to attempt to lower a small boat, and as our only alternative was to attempt to rescue ourselves, we put off in our long boat and in a few minutes were on the deck of the German bark. Our own vessel was a perfect wreck, and was only kept

WILSON'S STORY OF MURDER CONFIRMED. CHICAGO, Oct. 6.-The strange and wild story

of John M. Wilson, who staggered into the Twelfth Street Police Station on Saturday night proclauming himself a murderer, is true. The following dispatch from F. R. Kelly, chief of detectives, received last night from Philadelphia, confirms his tale:

Philadelphia, confirms his taic:
Hold Wison. He is wanted for the murder of
Anthony Daly, who disappeared mysteriously about the
middle of February, 1884, from his farm in Montgomery
County, near Joy Hull Cemetery. Will send on for him.
In his drunken talk Wilson told of the manner in which he killed Authony Daly. After he had worked for him he asked for money, and on being refused visited a neighboring village and got arank. Returning he stealthily entered the sleeping room of Daly, and picking up a meat cleaver, brained his sleeping victim. He then hacked the body to I leces, sewed the severad members in a bag and dumped them into the Wissahlekon River. When sufficiently sober to realize the enormity of his crime he fiel. He is a small man, about twenty-seven years of age, a native of Nova Scotla. About two weeks ago he met a entid greatly resembling that of the man he murfared. Since then he has known no reace of mind, and on Saturday night he got drunk and hired a boy to take him to the police station, where he made his confession. When told that his story had been verified he appeared pleased.

LIBEL SUITS BY WILLIAM A. SIMMONS.

Boston, Oct. 6 (Special) .- Ex-Collector and ex-Water Commissioner William A. Simmons has begun libel suits agains Councilman Herbert L. Harding, who made charges of irregularity against the Water Com-missioners for 1881, and particularly against Mr. Simmons, who was then chairman of the board; and also against Cyrus A. Page, treasurer of the Beacon Publishing Company. He says that Mr. Harding uttered the libel in a speech before the Common Council, delivered in May, in which he made charges which brought about the Fisher-Hill Investigation. Mr. Simmons's complaint the Fisher-Hill investigation. Mr. Simmons's compilaint against The Beacon is because of a cartoon published in that paper which represented a scene in a rural district. A farmer stands under an appie tree with a large hay fork in his hand. He has just detected a small boy, who, with his old hat filled with stolen appies, is running away. The farmer has a face which is unmistakably a likeness of Mayor O'Brisn. The boy on the sole of his shoe has the letter "S," and his face is like that of Mr. Simmons. Under the cartoon are printed four words: "You get—You bet." The damages are placed at \$50,000 in each case.

FURTHER EVIDENCE OF INEFFICIENCY.

COMPLAINTS TO POSTMASTER PEARSON-THE FISH-

ING-SMACK LINE TO CUBA. Further inquiries regarding the new foreign unall service which Postmaster-General Vilas has sub-stituted for that furnished by the American steamship lines bring out much evidence showing the thorough un-

lines bring out much evidence showing the thorough untrustworthiness of the transportation now secured, and of the injuries done to commerce by reason of the delays caused. The following is a sample of a large part of the mail Postmaster Pearson is now receiving:

New-Yonk, Oct. 3, 1885.

Hon. H. G. Pearson, Postmaster, New-Yonk City

Dear Six: Referring to our respects of August 12 and to your kind reply of 17th same, we now bee leave to hand you a nemorandum of arrival of mails from New-York at Calino per Atlas Line, via Kingston, Janualea, constraing nearly every time about one month instead of twenty or twenty-one flays as heretofore by the Pacific Mail Steamship Line. You will readily see how hurtful this delay is to us merchants engaged in the South Pacific trade, and we respectfully protest sgainst this unnecessary delay and round-aboutway of sending our mails to Colon and the South Pacific ports. Very respectfully,

Davis Buothers.

Left New-York. Arrived Kingston.

The Ward line to Havana have made a distinct proposition to Mr. Vilas that if he will abandon his "fishings smack express," and intrust his mails to their steamships they will carry them for \$500 a trip and for \$50 additional to the Cuban southside ports of Santiago and Cienfuegos. Considering that the little Government of Nassau pays them \$1,500 a trip for their service they regard their offer as extremely reasonable. By far the greater part of the Cuban mail now goes down on the Ward and Alexandre steamers. Under the provisions of the Dingley bill they are permitted to carry letters which have not gone through the post office if they are sent in of departure. Though this privilege is given them it is considered inconsistent with I the postal treaty of Paris. Information has been received from Havana that the flues every such letter its proper postage and double the postage in addition. The steamship companies and the mercantile public are at a loss to understand why Mr. mercantitic public are at a loss to understand why Mr. Vilas, besides persecuting them himself, should seek to induce other countries to and to their burdens. It is also represented to them that Mr. Vilas has sought to persuade the Hayana authorities to discentinue to American steam's hips the port privileges they have enloyed as mail carriers, such as half tonnage dues, the privilege of roing into port at any time and of discharging and loading before entrance in the Custom House. The Hayana Government declined to reacind these rights, however, on the ground that the Cuban mails are sent back to this country in the Ward and Alexandre vessels. When Mr. Vilas sought to have the Hayana postmaster send his mails back in his fishing-smacks, that officer addressed a letter to the Commandant of the Navy, asking if in his opinion such a method of transporting the mails was safe or in harmony with the provisions of the postal treaty. The commandant replied that it was not, and directed that the Cuban mails should be sent back by the stearners. It is said in Hayana that the colonial Government will sak Spain to address a letter to Washington complaining of the fishing-smack business.

A little consting steamer is being built by Cramp 4 Sons, of Phinadelphia, for a Tampa company for trade between that town, Key West and Hayana. People from Hayana say that this experiment has frequently been tried without success before, the reason being that there is not enough passage or traffic to sustain it. Mr. Vilas expects to use it instead of the fishing smacks at soon as it is finished.

To test the quanty of Mr. Vilas's Mexican overland rout a letter was sent from Vera Cruz on the Alexandro seamer City of Paebla September 18. A copy was also sent on the same day by the overland train. The original reached its destination September 20 contains this statement: "By the American fishing slaop Alaska, which arrived yesterday a fitternoon, we have received our fless of correspondence from New York, the latest date in which is the 19th Vilas, besides persecuting them himself, should seek to induce other countries to and to their burdens. COACHED BY THE GREAT OBJECTOR. ME, VILAS'S WISDOM (?) LEARNED AT THE FEET OF ME, HOLMAN-ECONOMY THE WATCHWORD.

WASHINGTON, Oct. 6,-When the appropriaon of \$800,000 for the transportation of the foreign mails of the United States was before Congress, last winter, the chief opposition to its passage came from Samuel J. Randall and William S. Holman. The Indiana Congressman was particularly violent in his attacks upon the bill. When the vote upon its final passage came to be taken, it was, apparent that the shipping people were strong enough to defeat the whole Approprintion bill if this classe was stricken out, and that Holman and Randall could work up enough Democratic opposition to strike it out if they persisted. But they re not prepared to take the odium of being responsible for an extra session to pass an appropriation bill. They thought that they saw a better way of accomplishing

their purpose of grinding down the steamship companics

to the old rate of mail expense. Their better way is Postmaster-General Vilas. From the moment that he came to Washington he has been under the political control of Holman. It was Holman who showed him what a great reputation could be made by working the "ceonomy" crank. He pointed to himself as a bright and shining example of the statesmanship that indiscriminately objects. It was Holman who sixgested that the act, of 1885 was "discretionary." And when the steamship men were here in July, Mr. Vilas's sole ansare to their arguments was that he thought the srevice ought to be done cheaper. When they showed him that they had actually lost money in the care, reception and delivery of the mails, he said that they rot as much for it as for any other freight. When they pointed out the disabilities under which they labored in competing with heavily subsidized foreign lines, he said that he could not help it. When they showed that the Government had made nearly \$726,000 on its foreign service last year, and could well afford to pay them fairly, he said that he meant to be economical. When they told him that the little governments of Mexico, Central and Spanish America, to say nothing of China, Japan and Australia, paid from ten to one hundred times as much for the mail service as the United States paid, and thought they were well rewarded in commercial advantages for their expense, he made answer that that was their lookout. For a whole day they strated and labored with him and they Jargued and labored in vair. To all their inquiries he responded: I will see amout it."
